The Right Selection of WORK HOLDING & TOOL HOLDING Technology ensures Cost Efficient and Quality Production

ABOUT US

HOLDWEL is a company aimed towards supply of **Highly Reliable Products** to enable our customers in achieving excellence in manufacturing Industry. We believe that selection of correct Work Holding & Tool Holding and Gauging not only ensures Quality Production but also Enhances the Production, ultimately leading to lower cost and higher profits

With a strong hands on experience of almost 30 years in manufacturing and by keeping ourselves continuously updated with the current technologies in the field of **WORK HOLDING & TOOL HOLDING**, we serve our customers by offering them the best and most economical solutions to machine their parts resulting in higher production and low per part cost.

Our **VISION** is to be a supplier of technically better products for Work Holding, Tool Holding & Gauging and achieve highest level of customer satisfaction while they use our products.

Consistently achieving High Quality Manufacturing in Auto Parts and Engineering Industry is a Herculean Task. One needs highly accurate and long-lasting Gauges to check the machined parts at manufacturing station only. We opted to be a supplier of **HIGH QUALITY GAUGING equipment** to have a forward integration to our basic business line
